[HTML] Measuring accessibility and utilization of public spaces in Famagusta

N Pasaogullari, N Doratli

Cities, 2004 • Elsevier

> Public spaces have a central role, both physically and functionally, in urban planning and development. Many urban theorists state their significant role as one of the principal components of a healthy urban setting. This is in addition to their functional role, when they increase a sense of community when intensive social interaction takes place in these areas. However, recently, they have started to lose significance, when they are neglected in the urban planning process, or when existing spaces are lost. Additionally, accessibility

Eurasian Journal of Educational Research, 2013 • ERIC

> **Problem Statement**
>
> Design is an indispensable part of the human being. It enters one's life on the very first day that the eyes open. Design awareness is developed at an early age. With a proper education, even in the preschool years, design is experienced within one's close environment.

Technology adoption in architectural design studios for educational activities

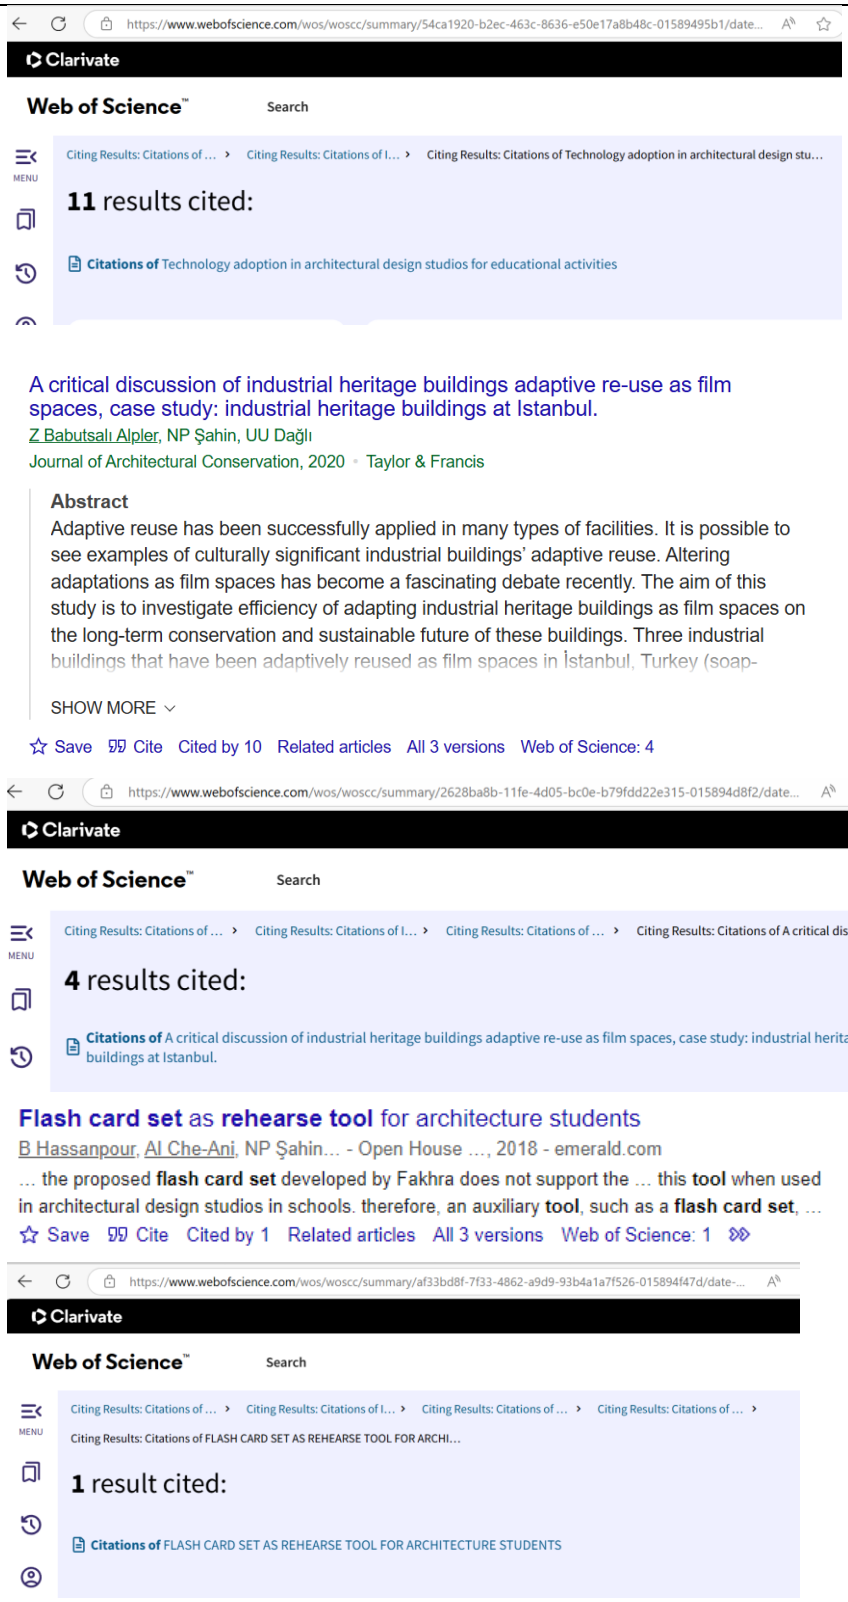

B Hassanpour, NP Şahin

Technology, Pedagogy and Education, 2021 • Taylor & Francis

> **Abstract**
>
> Technology in architectural education is usually discussed as a 'method', optimising course systems and determining instructional materials, while as a 'tool' it is discussed as a medium within students' design decision-making processes. This article explores the development of technology use in a teaching context, encompassing relationships between technology as method and tool. The teaching focus concerns the effects of technological-instructional tactics for addressing commonly reported issues for
